opti-myst®
The Professional Range

Introducing the 500 and 1000 Cassettes

Introducing a new range of Opti-myst cassettes which offer more features than ever before. For the first time these Opti-myst fires can be plumbed to the water supply – removing the need to regularly fill up the bottle. These cassettes can also be connected in series, giving greater flexibility to designs. To further enhance the experience, the cassettes have added sound effects which offer the warming atmosphere of a crackling blaze.

Add Opti-myst to your designs

The Dimplex Pro Range caters for furniture designers, architects and fireplace manufacturers. Opti-myst cassettes can be the vital ingredient for creating an individual piece of bespoke furniture or an eye-catching focal point.
